THE FLOODING OF THE SCHOOL

Isabel Gutierrez Bernal - Rainbow stars (5°A)

We all know that without earthquakes we wouldn't exist because the land would be flat and we would be covered of water, this is a story about that. In a city named Bernet it was a tragedy, there were no earthquakes during the last 40,000,000 years, so the land started to be flat. One day a girl named Maria Jose that lived there on Bernet started to notice that the school was flooded so she was so scared and she searched for Sofia that was her BFF (best friends) but also was so intelligent. Sofia didn't know what to do until... she remembers that she read a book about earthquakes, land and natural disasters, she explain that the flood was caused by the absence of earthquakes. All the school started to say that she was crazy, that the earthquakes couldn't be good for us anyway you see it. They put her in a special place for crazy people.

The flood began to grow and grow and suddenly people began to feel a tickling on their feet that went up through their body. They saw that their feet vanished and had a beautiful, large and colorful fish tail, their skin was covered by scales. Women transformed into mermaids and all objects in sea organism. The bad people became in horrible sharks with white tusks and wish to bite.

Meanwhile, Sofia, behind bars, was transforming into a beautiful and redheaded sea maid, seeing how slowly abuser people was convert in ugly sharks. Until

appeared a little sea horse and putting her in her back take her out of the bars. She was Maria Jose. The two of them together showed to the rest of the inhabitants that Sofia was alright and since then she was the Sea Princess.
